

KM Hydraulic Solutions

LARGE PRIMING PUMP

For fast and reliable priming the priming pumps are essential. Priming takes from 2 seconds upwards, depending on the length and size of hose being used.

The pump is made out of aluminum and therefore corrosion resistant.

1 INCH ROTARY COUPLER

- One of a kind rotary coupler with a unique design by KMH.
- Proven to be very successful, reliable as well very popular.
- It's corrosion resistant and maintenance free.

18mm SPRAY GUN and MONITOR

This 18mm spray gun is perfect for your firetruck. If you're running a powerful pump that produces massive amounts of water and you require a long range, this spray gun in your solution.

BRASS NOZZLES

Test Pressure	Nozzle	Equivalent to nozzle size	Liters/ minute
6 bar	0.5 inch	5.5mm	0 - 50 liters
6 bar	¾ inch	7.0mm	0 - 75 liters
6 bar	1 inch ¾ hose	8.0mm	0 - 117 liters
6 bar	1 inch 40mm hose	9.0mm	0 - 130 liters

- These nozzles are designed for effective fire fighting.
- Designed with durable long lasting material.
- If cleaning is required, open the nozzle wide to flush debris out.
- Nozzles are also adjustable for different sprays from a spray to powerful straight line for long distance.
- Available in three different sizes suited for your needs.
- Jet can be closed down to zero flow.

FEATURE :

These nozzles are designed is such away for easy use and provide maximum spray or pressure for distance. Easily cleared of any blockage when opened to the large spray. Built to last!

ADVANTAGE :

The easy cleaning design allows for fast and effective fire fighting. Produces very compact jet flow for long distance fire fighting.

BENEFIT :

The nozzles are small and easily attached. When using the smallest nozzle you wont use excessive water meaning less refilling trips. These nozzles are durable, light-weight and suitable for your fire fighting needs.
