

ROVATTI MULTI-STAGE HYDRAULIC PUMP

HYDRAULIC FIRE SOLUTIONS

OVERVIEW

Engineered for large-scale firefighting and high-volume water transfer.

A robust, three-stage design for:

- Timber Yard Fires
- Sugar Cane Field Protection
- Industrial Cleaning

KEY FEATURES & BENEFITS

- **Superior Pressure & Flow:** Perfect for demanding applications.
- **Three-Stage Design:** Maximizes efficiency and reliability.
- **Robust Construction:** Built for tough industrial environments.
- **Hydraulic-Driven Efficiency:** Uses existing tractor hydraulics (57 L/min @ 150 bar).

PERFORMANCE DATA

Flow Rate:

@ 7.5 bar
(minimum)

**Hydraulic
Flow:**

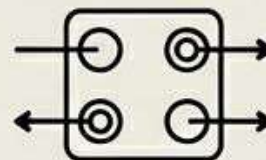

57 L/min
@ 150 bar

**Hydraulic
Compatibility:**

Ideal for tractors
with oil flows of
60–100 L/min.

**Safe Operating
Pressure:**

Do not exceed
15 bar (prevents
hose damage).

EASY INTEGRATION

Simple two-port hydraulic connections.

Standard hydraulic requirements: 57 L/min @ 150 bar.
