

TRACTOR TRAILER HYDRAULIC BRAKE VALVE: SABS 1447 COMPLIANT

PRODUCT OVERVIEW & BENEFITS

- **Graduated & Progressive Control:** This modulating valve saves trailer brakes and tyres because it works progressively.
- Progressive control (graduated braking) without taking hands off the steering wheel!
- The valve gives priority to trailer brakes, protecting tractor brakes from over use.

**Trailer brakes should always be well maintained to ensure efficiency!*

KEY FEATURES & TECHNICAL SPECIFICATIONS

- **Independent Operation:** Provides full progressive control. Works in tandem with tractor brakes but independently.
- **Tractor-Only Mode:** Single wheel brakes of tractor can be operated without the trailer braking at the same time.
- **Multi-Cylinder Support:** Operates with any number of brake cylinders (single, dual, etc.).
- **Integration:** Easy installation and seamless integration into the tractor's hydraulic system.
- **SABS 1447 Compliance:** Ensures safety and quality standards are met.
- **Operating Pressure Range:** 0 to 10.1 MPa.
- **Maximum Pressure Limit:** Externally adjustable to match specific trailer requirements.

TECHNICAL SPECS SUMMARY

Operating Pressure >3BS 1447

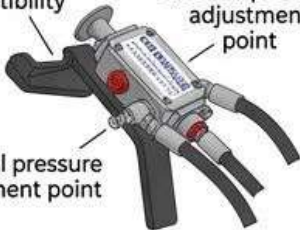

Operating Pressure Range: 0 to 10.1 MPa.

Maximum Pressure Limit: Externally adjustable to match specific trailer requirements.

Multi-cylinder compatibility

External pressure adjustment point

External pressure adjustment point
